

Pesticide Policy

The application of pesticides of any type is prohibited on the grounds of the conservancy without Friends of Lake View Hill Park (FOLVHP) board approval. Invasive or exotic flora/fauna will be controlled exclusively by natural techniques such as brushing and burning as detailed in a Restoration & Management Plan (RMP) or equivalent document. In the rare event that natural approaches are not feasible, and an "artificial" (e.g., chemical or synthetic) pesticide technique has been recommended by professional contractor, the least toxic and most highly controlled methods of application will be used and must be approved by a supermajority of the board.

The FOLVHP seek the cooperation of Dane County and its contractors with this policy, except that Facilities Management may continue to use small rodent poison dispensers near the buildings.
